Telephone Patch Panel / (With LED)

ASY-509-25
(25 Port)
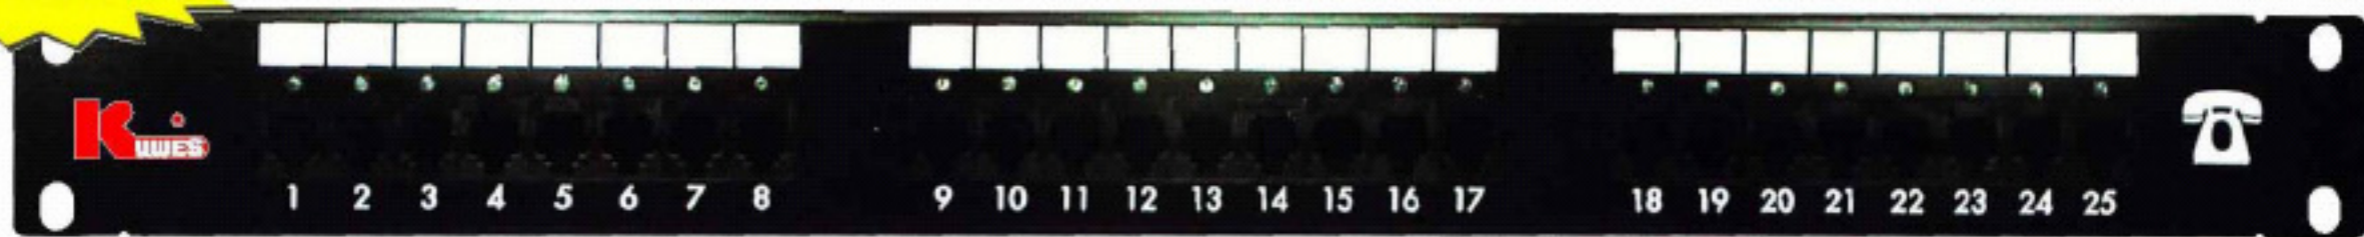

* Telephone patch panel is made of aluminum, alloy/spcc.
* light-weight and durable.
* LED indicator reveals faulty problem.
* Adjustable vertical hole.
* High density 1 U 25 and 50 port design, it is easy to assemble and maintain.
* Each port is clearly mark.   * 110 / krone compatible terminal design.
* USOC wiring indicated.

Applications

TP-PMD, ADSL, ISDN

Features

EIA-310-D
USOC Wiring
Complies FCC part 68.
110 IDC connector
Provides termination for 22-26 AWG wire

Specifications

Contacts are 50u" gold-plated
Jack insertion life cycles >750
IDC insertion life cycles >250
Contact resistance : 20M ohm
Current rating : 1.5Amps
DC resistance : Max.0.1 ohm
Operating temperture:-40~+60 C degrees

ISDN (Cat.3) Patch Panel

KUWES ISDN patch panel utilizes printed circuit design to provide high performance and flexible application. Offering 25 or 50 port panel for ISDN or Cat.3 wiring system. The design of the PCB provides connection for data or voice application on pin 3,4,5,6 of the RJ45 Jacks. 4 different terminal options are available.

Waterproof Distribution Box

◆ Housing material: ABS
◆ Mounting Rack material: Steel
